

Gentlepersons,

I am incredibly happy to recommend Daniel Giberson for your baseball program. Although schools shutting down campus kept me from observing Dan on the field, I can firmly say that Dan is a student who takes his work seriously. Dan was my student in both Economics and US History, he was a leader in the classroom often organizing his peers and then performing quality control on any assignments being turned in. I imagine this is how he works on the field and if I had to put together a baseball team made of my students, Dan would be the team captain.

Please reach out for any questions
