To whom it may concern,

It is with great pleasure that I recommend Jack Simons. I have had the distinct pleasure of having Jack as a member of Student Council for the last three years. He has always been more than the ideal student; he goes above and beyond what is required for his classes. He is a polite, meticulous, diligent young man who will succeed at anything he puts his mind to. I highly recommend Jack to receive your scholarship/admittance to your university.

I have had the opportunity to see him grow through his leadership skills. When I met Jack he was part of the general membership of StuCo, and now as a senior he is Student Body 2<sup>nd</sup> Vice President. Jack has always gone the extra mile when it comes to getting the job done. Whether it was chairing the blood drive, finding and running extra community service opportunities for the whole council, or running lunch time events he never fails to impress me. Jack has proven that through hard work, dedication, and leadership, that he can accomplish tasks in a courteous and timely manner.

Jack has been a part of Student Council for almost three years, starting his freshmen year. He has participated in football, track, and baseball from freshman year to his senior year while juggling academics and Student Council. Student Council and being a member of these sporting teams have helped advance Jack's leadership, time management, and communication skills.

Jack clearly has strong values, and respects his education. He speaks with good judgment and strength far beyond his high school years. Having dealt with personal obstacles, Jack knows the world is not always easy and is willing to take on new challenges. Because of his outgoing personality he works very well with others and strives to include everyone. He never backs down because of the unknown; it just pushes him to achieve more.

Jack is well equipped to grow from challenges that he encounters. His leadership, communication, and problem solving skills prepare him for success in any organization. I strongly suggest making Jack a recipient of your scholarship or admittance to your university.

Sincerely,

Wyatt Aping
