

To Whom it May Concern,

It is my great pleasure to recommend Brenden Crawley for admission to your institution. I have had the privilege of teaching Brenden in both Honors Algebra 2 and AP Statistics, and I have witnessed his impressive academic growth and maturity over the past few years.

Brenden is a student who truly embodies self-discipline and intellectual curiosity. While many seniors slow down academically, Brenden has done the opposite—embracing challenge and rigor during his final year. He is currently enrolled in both AP Statistics and AP Precalculus, two of the most demanding math courses offered at our school. Taking them concurrently demonstrates not only his confidence in his mathematical abilities but also his drive to strengthen his analytical and problem-solving skills.

What distinguishes Brenden most, however, is his accountability for his own learning. If he ever forgets a concept or makes an error, he approaches it with honesty and humility—qualities that are too often overlooked in the younger generation. Rather than making excuses, he takes full ownership of his mistakes, asks insightful questions, and uses each experience as an opportunity to grow. This mindset has allowed him to build a deep and genuine understanding of the material, far beyond simple memorization.

In the classroom, Brenden's thoughtful engagement, curiosity, and strong work ethic set a positive example for his peers. His ability to balance perseverance with reflection makes him not only a high-achieving student but also a model of integrity and character.

I am confident that Brenden will bring the same maturity, honesty, and determination to his college studies that he demonstrates daily in my classroom. He is a student who values learning for its own sake and approaches challenges with both intellect and integrity. I wholeheartedly recommend him for admission to your institution.

Sincerely,

Melissa Major
