

Regarding Porter Chastain:

I have coached Porter for a few years in club and can entirely give my recommendation on his behalf. Porter is a hard working player with high character, the kind coaches want in their program. Pays attention to details and makes great adjustments. Has always been a great teammate and high energy kid in the dugout. He is growing quickly as a baseball player with a great combination of contact, power and high baseball IQ. As a batter he has seen high competition and led our team this fall in average and was near the top in most offensive categories. Power is coming on quickly. He has won many player of the game awards and came in clutch when we needed him many times.

Defensively he is able to play numerous positions SS, 3B and 2B. I think he has a high ceiling and will just increase as he grows and gets stronger. Definitely a college baseball player.
