

Stephanie Eastman (Tyler's Biology Teacher)

"Tyler has just completed his sophomore year and was in my Biology class as a freshman. He is well spoken and mature for his age. He has had lofty goals and has been working to achieve those goals since I met him as a freshman. Tyler pushes himself academically by taking higher level courses, courses that are typically a year ahead of his peers. His goal is to attend a four year university and play baseball while studying sports management and hopefully one day work for a major league baseball organization."
